

AFRAH MUSHTAQ MUKADAM

SOFTWARE DEVELOPER | WEB DEVELOPER | FULL STACK DEVELOPER

✉ mukadamafrah@gmail.com

☎ (+971) 0556397865

📍 Dubai, United Arab Emirates

🛂 Visa Status: Student Visa

PERSONAL DETAILS

[LinkedIn: Afrah Mukadam](#)

[Github: Afrah Mukadam](#)

[Portfolio: Afrah Mukadam](#)

SKILLS

Frontend Development: HTML, CSS, JavaScript, Bootstrap, AngularJS, ReactJS, TypeScript, XML

Backend Development: PHP, Python, NodeJS, Django, SQL, NoSQL, MongoDB, Amazon Web Services (AWS)

Mobile App Development: Android, Flutter, Kotlin

Other Skills: WordPress Development, Cloud Computing, Machine Learning, Data Science, GitHub, OOP, C, C++

CERTIFICATIONS

- Boosting Machine learning models in Python (Infosys)
- Python Basics for Data Science (IBM)
- Mobile App Development (Cisco thingQbator)
- Cybersecurity Foundation (Palo Alto Networks)
- Introduction to AWS Solutions (AWS)
- .Net Fundamentals (Great Learning)
- Project Management Virtual Experience (Forage)
- Introduction to Generative AI Studio (Google Cloud)
- Getting Started with Full Stack Java Development (Simplilearn)

PUBLICATIONS

WORK EXPERIENCE

Skillvertex

July 2022 - Sep 2022

Cloud Computing Intern

- Undertook an internship in Cloud Computing at Skillvertex, focusing on fundamental concepts.
- Enhanced understanding of cloud architecture and deployment strategies.
- Explored how to effectively utilize cloud services for diverse applications.

Kiyanch Solutions, Faridabad

Oct 2021 - Jan 2022

Software Developer

- Developed and maintained web applications with responsive UI/UX.
- Designed backend architectures and optimized database performance.
- Integrated APIs and implemented secure user authentication mechanisms.
- Technologies Used: HTML, CSS, JavaScript, Node.js, PHP, MySQL.

Aaryak Solutions Pvt. Ltd, Ratnagiri

May 2019 - June 2019

Web Developer

- Designed and implemented full-stack web applications with real-time functionality.
- Managed server-side optimization and database administration.
- Ensured best security practices for data protection.
- Technologies Used: HTML, CSS, JavaScript, PHP, MySQL, Node.js.

EDUCATION

Bachelor of Information Technology Engineering (B.E.)

Dec 2020 - June 2023

Finolex Academy of Management and Technology (India)

9.67 CGPI

Diploma in Computer Engineering

Dec 2017 - June 2020

Government Polytechnic, Ratnagiri (India)

90.57 %

PROJECTS

Emotion Recognition using Image Processing

- Developed a real-time emotion detection system that classifies facial expressions into categories like Happy, Sad, Angry, etc.
- Used OpenCV for image capture and facial feature detection, and CNN models for training on facial emotion datasets. Enabled live video feed processing with minimal latency, demonstrating practical AI implementation.
- Designed a user-friendly interface and integrated model output with camera stream visualization.
- Technologies: Python, OpenCV, NumPy, Machine Learning (CNN), Haar Cascade Classifier

Flight Fare Prediction

- Built a regression-based prediction model to estimate flight ticket prices using historical data.
- Cleaned and transformed complex datasets, handled categorical variables, and performed feature engineering.
- Evaluated multiple machine learning models like Random Forest, Decision Tree and delivered a solution that predicted fares with high accuracy and visualized key pricing trends.
- Designed a user-friendly frontend interface using HTML, CSS, Bootstrap, JavaScript.
- Technologies: Python, Scikit-learn, Pandas, NumPy, Matplotlib,

Online Clothes Shopping System

- Designed and developed a responsive ecommerce full-stack web application for online clothes shopping.
- Implemented user registration/login system with form validation and secured password. Integrated product listing, search, cart management, order confirmation, and feedback modules.
- Developed an admin dashboard to manage inventory, users, and order status in real time.
- Ensured clean UI/UX and mobile compatibility using Bootstrap.
- Technologies: HTML, CSS, JavaScript, PHP, MySQL, Bootstrap
